

# How can i enforce swift style

linting rules.

By :[Sally Ahmed](#)

# Project Life Cycle

# Problem

- Naming
- Force Casting
- Force Try!
- Complexity
- No body func

# Integrate swiftlint with my project

Install [swiftlint](#)

\* [Homebrew](#)

```
/usr/bin/ruby -e "$(curl -fsSL  
https://raw.githubusercontent.com/Homebrew/install/master/install)"
```

then

```
brew install swiftlint
```

## Swiftlint - Rules

- `opt_in_rules`
- `disabled_rules`
- `included`
- `excluded`

# Linting Tools
